Brodolomnici iz vazduha Castaways from the Air

23. marta 1865. u vazduhu su se, iznad Tihog okeana, čuli ovi očajnički glasovi:

„Penjemo li se?“

„Naprotiv, spuštamo se.“

„Čujem neki zvuk kao šum mora.“

„Mora da je sto pedeset metara ispod nas.“

„U tom slučaju moramo da poizbacujemo sve teško. Brzo!“

Bilo je pet putnika u balonu koji se vrteo ukrug usred orkana koji je naneo strahovitu štetu u Americi, Evropi i Aziji. Oluja je besnela pet dana, te su ovi putnici sigurno dolazili izdaleka. Od oblaka koji su ih obavili nisu videli gde se nalaze.

On 23rd March 1865, there could be heard, in the air above the Pacific Ocean, these desperate voices.

“Are we going up?”

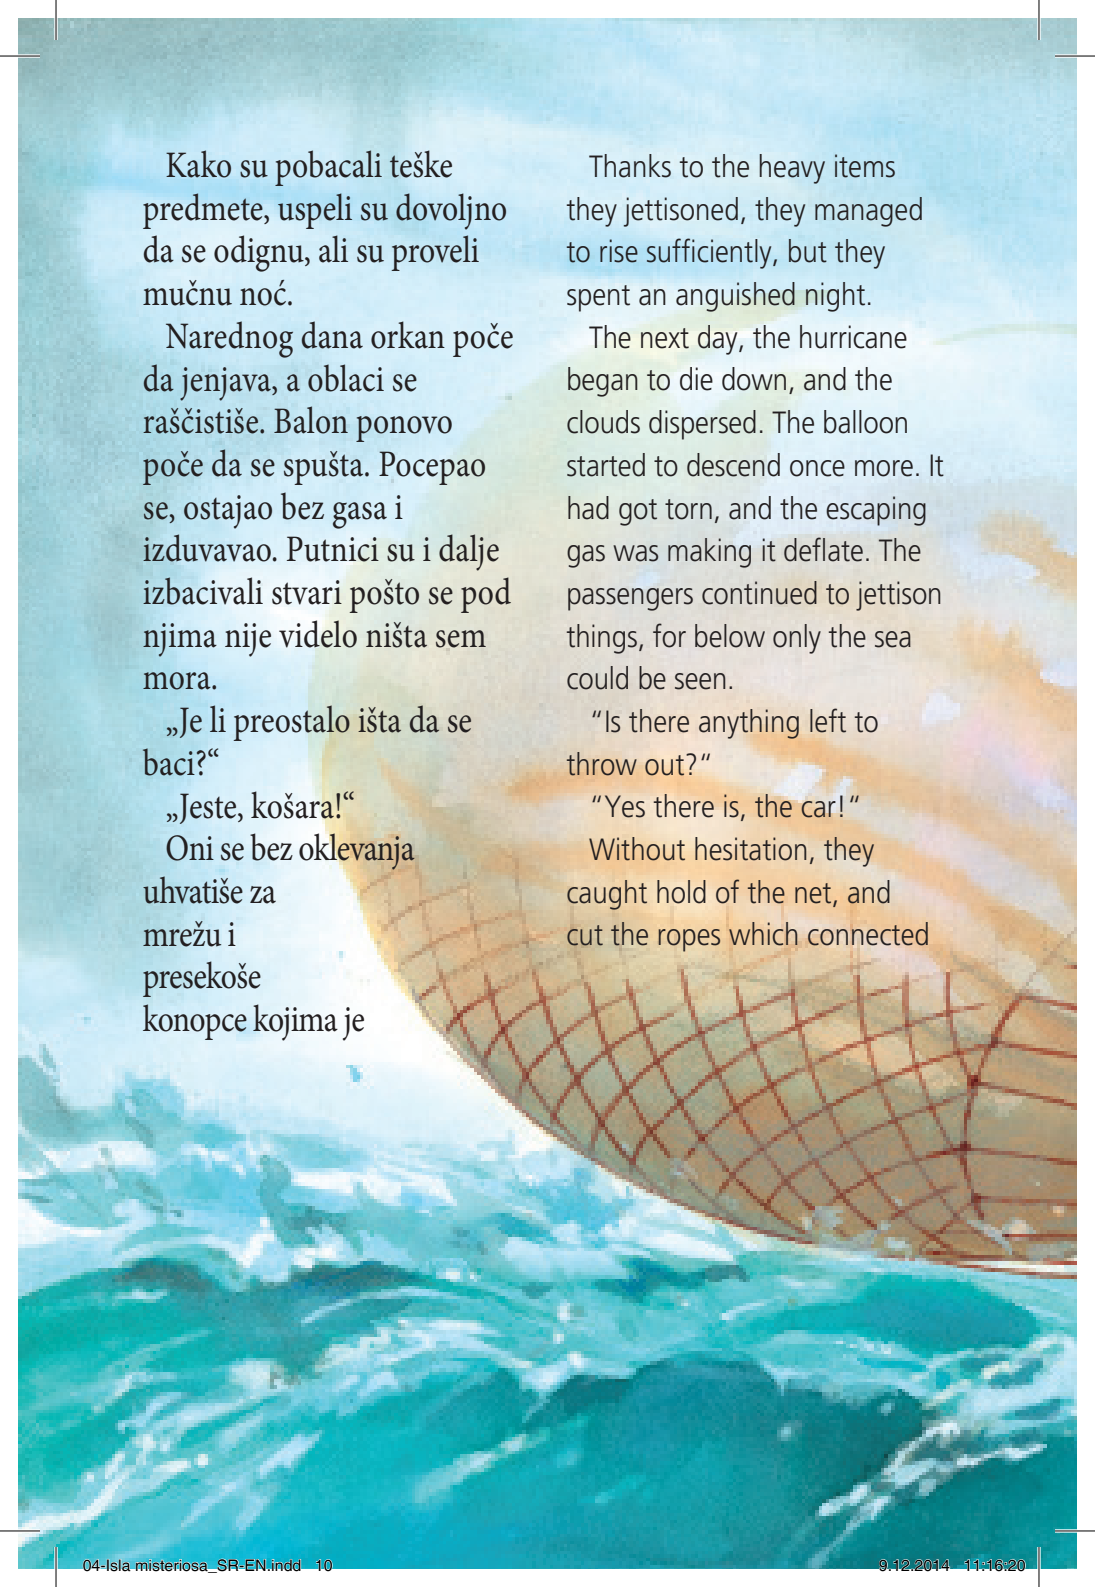

“On the contrary, we are going down.”

“I can hear a sound like the sea.”

“It must be about 150 metres below.”

“In that case we’ll have to throw out everything heavy. Quickly!”

They were five passengers in a balloon which was spinning round and round in the middle of a hurricane which had been causing terrible damage in America, Europe and Asia. The tempest had raged for five days, so these passengers must have come from very far away. The clouds which enveloped them prevented them from seeing where they were.

Kako su pobacali teške predmete, uspeali su dovoljno da se odignu, ali su proveli mučnu noć.

Narednog dana orkan počeo da jenjava, a oblaci se raščistiše. Balon ponovo počeo da se spušta. Pocepao se, ostajao bez gasa i izduvavao. Putnici su i dalje izbacivali stvari pošto se pod njima nije videlo ništa sem mora.

„Je li preostalo išta da se baci?“

„Jeste, košara!“

Oni se bez oklevanja uhvatiše za mrežu i presekoše konopce kojima je

Thanks to the heavy items they jettisoned, they managed to rise sufficiently, but they spent an anguished night.

The next day, the hurricane began to die down, and the clouds dispersed. The balloon started to descend once more. It had got torn, and the escaping gas was making it deflate. The passengers continued to jettison things, for below only the sea could be seen.

“Is there anything left to throw out?”

“Yes there is, the car!”

Without hesitation, they caught hold of the net, and cut the ropes which connected

košara bila vezana za balon. Balon se potom diže, a putnici su visili o mreži čitav sat dok ponovo nisu pali na samo sto metara od mora.

Tad se začu lavež psa kog je sa sobom poveo jedan putnik, a on povika:

„Top je nešto opazio!“

„Kopno na vidiku!“, povika drugi čovek.

To izdignuto kopno bilo je još podaleko, a njih su zapljuskivali talasi pobesnelog mora. Na nekoliko metra od kopna pogodi ih ogroman talas, balon se naglo odiže, pa pade na peščanu obalu.

the basket to the balloon. This then rose up, and they hung on like that for an hour until once more they dropped to within 100 metres from the sea.

A bark was then heard, from a dog accompanying one of the men, who shouted

“Top has seen something!”

“Land ho!” shouted another man.

This high land was still some way off and they were being splashed by the waves of the furious sea. A few metres from land, they were struck by a huge wave, the balloon lifted suddenly and then fell again onto a sandy beach.
